

CP3405 - PRACTICAL 2

Objectives

1. Finalise your main project groups and complete your team charter
2. Submit your Practical 1 reflection for feedback and start Practical 2 reflection
3. Start exploring the main project's problem domain

Marking Rubric

| | | | | |
|----------------------------|---|---|---|--|
| Practical Exercises | 3 marks All exercises are complete, and the work is outstanding. | 2 marks All exercises are complete, but the work isn't outstanding. | 1 mark The exercises were attempted, but not as expected. | 0 marks No exercises were not attempted. |
| Reflective Journal | 3 marks Contributions about experiences from the previous week are substantial and outstanding. | 2 marks Contributions about experiences from the previous week are substantial but not outstanding. | 1 mark Contributions about experiences from the previous week are less than expected. | 0 marks No contributions about experiences from the previous week were made. |

Task 1 – Finalise team formation – 30 mins

1. Setup various communication tools for your team (e.g. Slack, Google docs) and share them with your practical class supervisor. Your project artifacts must be available to all team members and the practical class supervisor!
2. Finalise your teams for CP3405 (you had a week to discuss and meet your potential teammates!)
3. In your newly formed teams, complete your team charter from last practical. That practical contains the team charter template. Ask your class supervisor for feedback about your team's charter.

Task 2 – Reflective journal – 1hr

Last week, we asked each student to reflect on the differences between predictive development (aka the waterfall approach) and empirical development (such as Agile, Scrum, Lean, Lean UX), or otherwise suggested by your practical class supervisor.

Discuss your reflection with your class supervisor. They will mark your work and offer immediate feedback useful to completing the next reflection task.

While you are waiting, you can start working on **this week's reflection task**:

Using Gibbs' model, reflect on one experience you had during the team formation experience in Practical 1.

Task 3 – JCU Job Link – 30 mins

You and your team should now read and analyse the CP3405 Project Brief document. This is an anonymised version of an HD-level CP2408 project from 2017. Also provided is the final Balsamiq mockup MVP. This will act as the starting point for your group. You and your group are free to review and adjust this project brief to take the project in a new direction based on your team's review of the existing project work user testing, personas, and other Lean UX artifacts.

CP3405 Assessment task 1 asks your team to run a pilot study focusing on some appropriate aspect of this project brief.
